

OSTHUS

ACCELERATE YOUR FUTURE

Software Engineer / Full Stack Engineer

RESPONSIBILITIES

- Work on international software projects with leading pharmaceutical and chemical companies. Work on international multi-time zone projects
 - Managing the end-to-end life cycle for the production of software and applications
 - Design, develop, test and deploy innovative lab informatics solutions
 - Collaborate with Data Science team to build predictive modelling and analytics applications
 - Work on-site with customers to build and integrate solutions into their informatics infrastructure
 - Overseeing the automated testing and providing feedback to management during the development process
 - Modify and support work with code reviews, unit/integration tests and documentation to previously developed programs
 - Handle all aspects of supporting enterprise applications (e.g. client issues, performance, data integrity, continuous integration).
 - Excellent writing and communication skills, aptitude for constantly learning new technologies, and willingness to travel, highly desired
-

REQUIREMENTS

- Master degree in Computer Science/Engineering or a comparable qualification. 5+ years experience preferred
 - Front-end technology: Expertise in front-end technologies, including JavaScript, CSS3 and HTML5 and third-party libraries such as React Js, Angular, jQuery and LESS.
 - Development languages: Knowledge of server-side programming languages including Net, Java, Ruby, Python and micro services and frameworks (such as Java EE/JBoss, Spring and Hibernate, etc.)
 - Database and cache: Familiarity with DBMS technology, including SQLServer, Oracle, MongoDB and MySQL and caching mechanisms such as Redis, Memcached and Varnish.
 - Basic design ability: Including knowledge of UI/UX and basic prototype design.
 - Demonstrate current hands-on coding experience in Java and Python. Demonstrate use of Git, SQL, and NoSQL
 - Experience on AWS / Google Cloud / Azure or Digital Ocean
 - Having Shell scripting, HTTP, TCP/IP, and SSH is a plus
 - Well versed in agile/scrum software engineering methodology spanning the full software development life-cycle
 - Command of various build systems such as Maven and Ant
-

ABOUT OSTHUS Group

OSTHUS Group supports teams in building a deeper understanding of how data can be used to strategically amplify enterprise value long-term. From integration management, analytics to archiving and purging, our team works with company stakeholders to transform enterprise data into high value digital asset. The Group consists of four companies at the moment: OSTHUS Services and three product companies: ZONTAL (e-Archiving and Lifecycle Management Systems), LeapAnalysis (Federated Virtualized Semantically-driven Data Integration) and Accurids (Distributed Reference and Master Data System), all of which offer ground-breaking technology where none of its kind currently exist in industry.

ABOUT OSTHUS Services

OSTHUS is a leader in Scientific Informatics. Our customers are the top companies in the pharmaceutical, bioinformatics and life science industries. With sites in Europe, the US and China, we offer a modern, exciting and attractive working environment. Using state-of-the-art methods and technologies, we work on future-oriented projects in the areas of Big Data, Machine Learning and AI. Personal development, innovation and diversity are of great importance to us as well as to our customers and employees.
