

Software Engineer - Full Stack Engineer (m/w/d)

RESPONSIBILITIES

- Work on international software projects with leading pharmaceutical and chemical companies
 - Work on-site with customers to build and integrate solutions into their IT-infrastructure
 - Design, develop, test and deploy innovative lab informatics solutions
 - Managing the end-to-end life cycle for the production of software and applications
 - Modify and support work with code reviews, unit/integration tests and documentation to previously developed programs
 - Handle all aspects of supporting enterprise applications (e.g. client issues, performance, data integrity, continuous integration)
 - Collaborate with Data Science team to build predictive modelling and analytics applications
 - Overseeing the automated testing and providing feedback to management during the development process
-

REQUIREMENTS

- Master degree in Computer Science or a comparable qualification
 - Knowledge of programming languages in particular Java and Python
 - Knowledge of Java, JavaEE and frameworks (e.g. Spring and Hibernate)
 - Command of various building systems such as Maven and Ant
 - Must be knowledgeable in Git (i.e. Gitlab)
 - Expertise in frontend technologies, including CSS3, HTML, JavaScript and JavaScript frameworks (e.g. React, Angular and jQuery)
 - Basic knowledge of UI and UX
 - Familiarity with DBMS technologies, including SQL Server, Elasticsearch, Oracle, MongoDB and MySQL
 - Experience on AWS, Google Cloud, Azure or Digital Ocean
 - Having Shell scripting, HTTP, TCP, IP, CI/CD, DevOps, or SSH experience is an advantage
 - Open and agile mindset, well versed in agile software engineering methodology
 - High proficiency of written and spoken english
-

ABOUT OSTHUS Group

OSTHUS Group supports teams in building a deeper understanding of how data can be used to strategically amplify enterprise value long-term. From integration management, analytics to archiving and purging, our team works with company stakeholders to transform enterprise data into high value digital asset. The Group consists of four companies at the moment: OSTHUS Services and three product companies: ZONTAL (e-Archiving and Lifecycle Management Systems), LeapAnalysis (Federated Virtualized Semantically-driven Data Integration) and Accurids (Distributed Reference and Master Data System), all of which offer ground-breaking technology where none of its kind currently exist in industry.

ABOUT OSTHUS Services

OSTHUS is a leader in Scientific Informatics. Our customers are the top companies in the pharmaceutical, bioinformatics and life science industries. With sites in Europe, the US and China, we offer a modern, exciting and attractive working environment. Using state-of-the-art methods and technologies, we work on future-oriented projects in the areas of Big Data, Machine Learning and AI. Personal development, innovation and diversity are of great importance to us as well as to our customers and employees.
